500 answers to FAQs.

Used 9000 times in 14 days.

1001 new suggestions.

For even more expert knowledge.

The knowledge database from Wilo.

Did you know? The knowledge database from Wilo will give you good and quick advice: with approx. 500 responses to the most frequently asked questions (FAQs) all about pumps, installations and systems. It is already being visited extensively by many skilled craftsmen. This is proven by 9000 utilisations in only 14 days, which we recently registered. The best thing: With every new question which you ask us with the contact form, we all become wiser together. Because the corresponding answer is naturally incorporated as soon as possible.

Know-how? We call this Pumpen Intelligenz.

Accessories

Stainless steel counter flange (oval and round)	211
Steel counter flange (round)	211
Victaulic coupling	211
Bypass line	212
Pressure sensor	212
PTC thermistor tripping unit	212

General notes and abbreviations

Abbreviations used and what they mean

Abbreviation	Meaning	Abbreviation	Meaning
1~	1-phase alternating current	SBM	Run signal or collective run signal
1/min	Revolutions per minute	SD	Three-phase motor with star/delta activation
3~	3-phase alternating current	SD-R	Three-phase motor with star/delta activation, rewirable
D	Direct activation	SSM	Fault signal or collective fault signal
°d H	Degree of German water hardness; Replaced with the SI unit mmol/l; conversion: $1^{\circ}\text{dH} = 0.1783 \text{ mmol/l}$	TrinkwV 2001	German Drinking Water Ordinance of 2001 (valid since 01.01.2003)
DM	Three-phase motor with direct activation	TRS	PTC thermistor sensor
DN	Nominal diameter of the flange connection	v	Speed (velocity)
EM	Single-phase motor with starting capacitor	WRAS	Water Regulations Advisory Scheme (potable water approval for Great Britain and Northern Ireland)
EMSC	Single-phase motor with integrated starting capacitor	WSK	Thermal winding contacts (in motor for monitoring winding temperature, full motor protection due to additional relay)
GRD/GLRD	Mechanical seal	Y/Δ	Star/delta activation
H	Delivery head	▲	Operating mode of double pumps: Individual operation of the respective duty pump
H _z	Approval range for sprinkler pumps	▲ + ▲	Operating mode of double pumps: Parallel operation of both pumps
I _A	Starting current	●	Number of poles of electric motors: 2-pole motor = approx. 2900 1/min at 50 Hz
I _N	Rated current; current at P ₂	●	Number of poles of electric motors: 4-pole motor = approx. 1450 1/min at 50 Hz
Inst.	Installation: H = horizontal, V = vertical	●	Number of poles of electric motors: 6-pole motor = approx. 950 1/min at 50 Hz
I _w	Current consumption for power requirement of the shaft P _w		
KTL coating	Cataphoretic coating: coat with high adhesive strength for long-lasting corrosion protection		
KTW	Approval for products with plastics, for use in potable water applications		
LB	Readiness for delivery (L = stock article, C = available in 2 weeks, K = available in 4 weeks, A = available on request)		
max. Ø	Maximum unit diameter incl. cable		
mmol/l	Millimol per litre; SI unit for the assessment of the water hardness (total hardness or concentration of alkaline earth ions)		
P ₁	Power consumption (power supplied from the mains supply)		
PN	Pressure class in bar (e.g. PN10 = suitable up to 10 bar)		
P _N = P ₂	Rated motor power		
PT 100	Platinum temperature sensor with a resistance value of 100 Ω at 0 °C		
PTC	Positive temperature coefficient (see also: TRS)		
P _w	Power requirements of the pump hydraulics		
Q (=V̇)	Volume flow		
Q _z	Approval range for sprinkler pumps		
RV	Non-return valve		
RVF	Non-return valve, spring-mounted		

Material designations and their meaning

Material	Meaning
1.4021	Chrome steel X20Cr13
1.4057	Chrome steel X17CrNi16-2
1.4112	Chrome steel X 90 Cr Mo V 18
1.4122	Chrome steel X39CrMo17-1
1.4301	Chrome-nickel steel X5CrNi18-10
1.4305	Chrome-nickel steel X8CrNiS18-9
1.4306	Chrome-nickel steel X2CrNi19-11
1.4308	Chrome-nickel steel GX5CrNi19-10
1.4401	Chromium-nickel-molybdenum steel X5CrNiMo17-12-2
1.4408	Chromium-nickel-molybdenum steel GX5CrNiMo19-11-2
1.4462	Chromium-nickel-molybdenum steel X2CrNiMoN22-5-3
1.4470	Chromium-nickel-molybdenum steel GX2CrNiMoN22-5-3
1.4517	Chrome nickel molybdenum steel with copper addition GX2CrNiMoCuN25-6-3-3
1.4541	Chromium-nickel steel with titanium addition X6CrNiTi18-10
1.4542	Chromium-nickel steel with copper and niobium additions X5CrNiCuNb16-4
1.4571	Chrome-nickel steel with titanium addition X6CrNiMoTi17-12-2
1.4581	Chrome-nickel-molybdenum steel with niobium addition GX5CrNiMoNb19-11-2
Ceram	Ceramic coating; coating with very high adhesive strength, protection against corrosion and abrasion
EN-GJL	Cast iron (cast iron with lamellar graphite)
EN-GJS	Cast iron (ductile cast iron, also known as spheroidal cast iron)
G-CuAl10Si	Nickel-aluminium-bronze
G-CuSn10	Zinc-free bronze
GG	see EN-GJL
GGG	see EN-GJS
NiAl-Bz	Nickel-aluminium-bronze
Noryl	Fibreglass reinforced plastic
PC	Polycarbonate
SiC	Silicone carbide
St	Steel
St. vz.	Galvanized steel
V2A (A2)	Material group, e.g. 1.4301, 1.4306
V4A (A4)	Material group, e.g. 1.4404, 1.4571

Wear and tear

Pumps or pump components are subject to wear and tear in accordance with the best available technology (DIN 31051/DIN-EN 13306). This wear may vary depending on operating parameters (temperature, pressure, speed, water conditions) and the installation/usage situation and may result in the malfunction or failure at different times of the aforementioned products/components, including their electrical/electronic circuitry.

Wearing parts are all components subject to rotary or dynamic strain, including electronic components under tension, in particular:

- Seals (including mechanical seals), seal rings
- Stuffing boxes
- Bearings and shafts
- Impellers and pump components
- Wear rings and counter rings
- Stationary wear rings/wear plates
- Macerators
- Capacitors
- Relays/contactors/switches
- Electronic circuits, semiconductor components, etc.

When pumps and dynamic-type compressors (such as submersible mixers and recirculation pumps) and their components have a coating (cataphoretic coating, 2K or ceram coating), this coating is subject to constant wear from the abrasive components of the medium. Therefore, the coating is also included among the wear parts for these units.

We do not accept liability for faults or defects arising from natural wear and tear.

WILO – General Terms of Delivery and Service

The latest version of our General Terms of Delivery and Service can be found on the Internet at

High-pressure multistage centrifugal pumps

Single pumps

Series overview Wilo Economy MHIL, Multivert MVIL, Economy MHI

Series: Wilo-Economy MHIL

>Design

Non-self-priming multistage pump

>Application

- Water supply and pressure boosting
- Commerce and industry
- Washing and spraying systems
- Rainwater utilisation
- Cooling and cold water circuits

Series: Wilo-Multivert MVIL

>Design

Non-self-priming multistage pump

>Application

- Water supply and pressure boosting
- Commerce and industry
- Washing and spraying systems
- Rainwater utilisation
- Cooling and cold water circuits

Series: Wilo-Economy MHI

>Design

Non-self-priming multistage pump

>Application

- Water supply and pressure boosting
- Commerce and industry
- Cooling water circulation systems
- Washing and sprinkling systems

High-pressure multistage centrifugal pumps

Single pumps

Series overview Wilo Economy MHIL, Multivert MVIL, Economy MHI

Series: Wilo-Economy MHIL

> Special features/product benefits

- Impellers and stage chambers made of stainless steel 1.4301 (AISI 304)
- Pump housing made of cast iron EN-GJL-250, cataphoretically coated
- All relevant components are KTW- and WRAS-certified
- Single-phase current and three-phase current versions

> More information

	Page
• Equipment/function	16

High-pressure multistage centrifugal pumps

Single pumps

Series overview Wilo Economy MHIE, Helix V, Helix VE

Series: Wilo-Economy MHIE

>Design

Non-self-priming multistage pump with integrated frequency converter

>Application

- Water supply and pressure boosting
- Fire fighting systems
- Industrial circulation systems
- Process engineering
- Cooling water circulation systems
- Washing and sprinkling systems

Series: Wilo-Helix V

>Design

Non-self-priming, high-efficiency multi-stage high-pressure centrifugal pump in vertical design with inline connections

>Application

- Water supply and pressure boosting
- Industrial circulation systems
- Process water
- Cooling water circuits
- Fire extinguishing systems
- Washing systems
- Irrigation

Series: Wilo-Helix VE

>Design

Non-self-priming, high-efficiency vertical version high-pressure multistage centrifugal pump with in-line connections and integrated, air-cooled frequency converter

>Application

- Water supply and pressure boosting
- Industrial circulation systems
- Process water
- Cooling water circuits
- Washing systems
- Irrigation

High-pressure multistage centrifugal pumps

WILO

Single pumps

Series overview Wilo Economy MHIE, Helix V, Helix VE

Series: Wilo-Economy MHIE

> Special features/product benefits

- Easy commissioning
- All parts that come in contact with the fluid are made of stainless steel 1.4301 (AISI 304) or 1.4404 (AISI 316 L)
- Compact design
- Integrated frequency converter
- Full motor protection
- All relevant components are KTW- and WRAS-certified

Series: Wilo-Helix V

> Special features/product benefits

- Efficiency-optimised, laser-welded 2D/3D high-efficiency hydraulics
- IEC standard motor, 3-phase, 2-pole
- Easy pump replacement without pipe modification. Due to the modular pump housing, HELIX pumps can be installed in existing pipes.
- Easy-to-use mechanical seal with cartridge, equipped with a standard seal for easy maintenance.
- The spacer coupling enables the fast and easy replacement of the motor (from 5.5 kW and higher)
- The new flexible lantern design, which is available in two alignments, enables direct access to the mechanical seal.
- Potable water approval according to ACS/KTW/WRAS for all parts that come in contact with the fluid

Planning guide

Resistance list for pumps of the Wilo-Multivert MVI/MVIE series 2.. to 16-6 and Wilo-Economy MHI/MHIE – series 2.. to 16..

This list makes no claim to completeness. The specifications concerning the application options of various pumping materials for pumping the fluids listed have been compiled to the best of our knowledge. They should however not be regarded as anything other than non-binding guidelines. **No guarantee claims whatsoever are to be derived therefrom.**

In practice, the fluids listed here are very rarely pumped as substances in pure form. Even minor admixtures of other substances could significantly influence or alter the chemically aggressive characteristics of a basic substance. Incrustations, the formation of condensate and temperature increases also generally have negative effects. In many cases, practical experience is required before a conclusion can be reached as to whether or not the suitability of a particular material is sufficient.

The information given refers to mean values of experience. In individual cases where the results of water analyses are available, other application limits are possible. Acidic pH values, coatings, H₂S, sulphides, chlorine gas, chloride, ClO₂, chlorates, thiosulphates and SO₂ have a weakening effect on the materials. Sulphates, oxygen in solu-

tion, trisodium phosphate, nitrate, nitrite, alkaline pH value and CO₂ saturation (acidic) generally have a protective effect on the materials.

Limited application limits apply to industrial water with pure chloride salts without additional protective salt contents; in case of doubt, please consult Wilo. For additives for aqueous solutions e.g. corrosion protection additives or biocides, the resistance to water must be taken into account.

Attention:

Viton in combination with water is only resistant up to max. 90 °C.

We request that the key and/or the remarks are taken into account when using the resistance list.

If you have any questions concerning the resistance of the Wilo-Multivert MVI/MVIE 16../32../52../70../95.. series, please contact your sales and service office.

Remarks:

The properties of the fluid, such as density, solidification points, viscosity, etc. and/or explosion-protection regulations are to be taken into account additionally and separately in conjunction with this resistance list.

The application limits of the pumps in terms of pressure and temperature are to be taken into account.

Resistance list

High-pressure multistage centrifugal pumps

WILO

Single pumps

Series description Wilo-Economy MHIL

Design

Non-self-priming multistage pump

Application

- Water supply and pressure boosting
- Commerce and industry
- Washing and spraying systems
- Rainwater utilisation
- Cooling and cold water circuits

Type key

Example: **MHIL 302/E-1-230-50-2**

MHIL	Multistage horizontal high-pressure centrifugal pump
3	Volume flow in m ³ /h
02	Number of impellers
E	Seal type E = EPDM V = Viton
1	1 = 1~ (single-phase current) 3 = 3~ (three-phase current)
230	Connection voltage in V
50	Frequency in Hz
2	Number of poles

Special features/product benefits

- Impellers and stage chambers made of stainless steel 1.4301 (AISI 304)
- Pump housing made of cast iron EN-GJL-250, cataphoretically coated
- All relevant components are KTW- and WRAS-certified
- Single-phase current and three-phase current versions

Equipment/function

- Pump in monobloc design
- Threaded connection
- Single-phase or three-phase motor
- Single-phase motor with integrated thermal motor protection

Technical data

- Mains connection 1~230 V / 50 Hz or optionally 220 V / 60 Hz
- Mains connection 3~230V / 50 Hz (Δ) or optionally 220 V / 60 Hz (Δ), 400 V / 50 Hz (Y) or optionally 380 V / 60 Hz (Y)
- Fluid temperature -15 to +90 °C

- Max. operating pressure 10 bar

- Max. inlet pressure 6 bar
- Protection class IP 54
- Nominal diameters of pipe connections on pressure side Rp 1 or Rp 1 ¼, depending on type
- Nominal diameters of pipe connections on suction side Rp 1, Rp 1 ¼ or Rp 1 ½, depending on type

Materials

- Impellers stainless steel 1.4301
- Stage chambers stainless steel 1.4301
- Shaft stainless steel 1.4028
- Seal EPDM
- Housing cover EN-GJL-250 (cataphoretic coating)
- Lower housing section EN-GJL-250 (cataphoretic coating)
- Mechanical seal SiC/carbon
- Bearing tungsten carbide
- Pump base EN-GJL-250 (cataphoretic coating)

Scope of delivery

- Pump
- Installation and operating instructions

Note on inlet pressure

The maximum inlet pressure is calculated by subtracting the maximum delivery head of the pump at Q= 0 from the maximum operating pressure of the system.

Note on materials

1.4301 corresponds to AISI 304, 1.4404 corresponds to AISI 316L.

High-pressure multistage centrifugal pumps

Single pumps

Series description Wilo-Multivert MVIL

Design

Non-self-priming multistage pump

Application

- Water supply and pressure boosting
- Commerce and industry
- Washing and spraying systems
- Rainwater utilisation
- Cooling and cold water circuits

Type key

Example: **MVIL 102/16/E/3-400-50-2**

MVIL	Multistage vertical high-pressure centrifugal pump
1	Volume flow in m ³ /h
02	Number of impellers
E	Seal type E = EPDM
3	1 = 1~ (single-phase current) 3 = 3~ (three-phase current)
400	Connection voltage in V
50	Frequency in Hz
2	Number of poles

Special features/product benefits

- Stainless steel hydraulics 1.4301 (AISI 304)
- Pump housing made of cast iron EN-GJL-250, cataphoretically coated
- All relevant components are KTW- and WRAS-certified
- Single-phase current and three-phase current versions

Equipment/function

- Pump in inline design
- Hydraulics in 1.4301, pump base in EN-GJL-250
- Oval flange
- Single-phase or three-phase motor
- Single-phase motor with integrated thermal motor protection

Technical data

- Mains connection 3~230 V /50 Hz (Δ) or optionally 220 V /60 Hz
- Mains connection 3~230 V /50 Hz (Δ), optionally 220 V /60 Hz (Δ), 400 V /50 Hz (Y) or optionally 380 V /60 Hz (Y)
- Fluid temperature -15 to +90 °C
- Max. operating pressure 10 bar or 16 bar, depending on type
- Max. inlet pressure 6 bar or 10 bar, depending on type
- Protection class IP 54

- Nominal diameters of pipe connections Rp 1, Rp 1½ or Rp 1¾, depending on type

Materials

- Impellers stainless steel 1.4301
- Stage chambers stainless steel 1.4301
- Pump housing EN-GJL-250 (cataphoretic coating)
- Shaft stainless steel 1.4404
- Seal EPDM
- Housing cover EN-GJL-250 (cataphoretic coating)
- Lower housing section EN-GJL-250 (cataphoretic coating)
- Mechanical seal SiC/carbon
- Bearing tungsten carbide
- Pump base EN-GJL-250 (cataphoretic coating)

Scope of delivery

- Pump
- Oval counter flanges Rp 1 to Rp 1 1/2
- Installation and operating instructions

High-pressure multistage centrifugal pumps

Single pumps

Overview of versions Wilo-Multivert MVIL

Wilo-Multivert MVIL 1/3/5/9

Materials	
Pump base EN-GJL-250 with cataphoretic coating, hydraulics in 1.4301/1.4404 (AISI 304/316L)	•
Parts in contact with fluid in 1.4301 (AISI 304)	–
Parts in contact with fluid in 1.4404 (AISI 316L)	–
Seal version	
Seal	EPDM
Hydraulic connection	
Threaded connection	–
Oval flange	•
Round flange	•
Victaulic quick coupling	–
Motor version	
Individual motors	–
1~230 V, 50 Hz	• (up to $P_2 = 1.5 \text{ kW}$)
3~230 V, 50 Hz	–
3~400 V, 50 Hz	•
3~500 V, 50 Hz	–
1~110 V, 60 Hz	–
1~220 V, 60 Hz	optional
3~380 V, 60 Hz	optional
3~400 V, 60 Hz	–
3~440 V, 60 Hz	–
3~460 V, 60 Hz	–
3~480 V, 60 Hz	–
3~380 V to 440 V and 50 Hz to 60 Hz	–
Protection class	IP 54
Explosion protection	–
Motors with PTC thermistors	–
Motors with UL certificates	–
Motors with CSA certificates	–
Thermal motor protection switch	• (only 1~motors)
Speed can be controlled via external FC	•
Integrated frequency converter	–
Painting	
Individual painting	•

• = available, - = not available

Note on inlet pressure

The maximum inlet pressure is calculated by subtracting the maximum delivery head of the pump at Q= 0 from the maximum operating pressure of the system.

Note on materials

1.4301 corresponds to AISI 304, 1.4404 corresponds to AISI 316L.

High-pressure multistage centrifugal pumps

WILO

Single pumps

Series description Wilo-Economy MHI

Design

Non-self-priming multistage pump

Application

- Water supply and pressure boosting
- Commerce and industry
- Cooling water circulation systems
- Washing and sprinkling systems

Type key

Example: **MHI 202-1/E/1-230-50-2**

MHI Multistage horizontal high-pressure centrifugal pump

2 Volume flow in m³/h

02 Number of impellers

1 Material

1 = 1.4301 (AISI 304)

2 = 1.4404 (AISI 316L)

E Seal type

E = EPDM

V = Viton

1 1 = 1~ (single-phase current)

3 = 3~ (three-phase current)

230 Connection voltage in V

50 Frequency in Hz

2 Number of poles

Special features/product benefits

- All parts that come in contact with the fluid are made of stainless steel 1.4301 (AISI 304) or 1.4404 (AISI 316 L)
- Compact design
- All relevant components are KTW- and WRAS-certified

Equipment/function

- Stainless steel in monobloc design
- Threaded connection
- Single-phase or three-phase motor
- Single-phase motor with integrated thermal motor protection

Technical data

- Mains connection 1~230 V / 50 Hz or optionally 220 V / 60 Hz
- Mains connection 3~230V / 50 Hz (Δ) or optionally 220 V / 60 Hz (Δ), 400 V / 50 Hz (Y) or optionally 380 V / 60 Hz (Y)
- Fluid temperature -15 to +110 °C
- Max. operating pressure 10 bar

- Max. inlet pressure 6 bar

- Protection class IP 54

- Nominal diameters of pipe connections Rp 1, Rp 1 ¼ or Rp 1 ½, depending on type

Materials

- Impellers, stage chambers and pump housing stainless steel 1.4301/1.4404
- Shaft stainless steel 1.4404
- Seal EPDM (EP 851)/Viton
- Mechanical seal B-carbon/tungsten carbide
- Bearing tungsten carbide
- Pump base aluminium

Scope of delivery

- Pump
- Installation and operating instructions

Single pumps

Overview of versions Wilo-Economy MHI

Wilo-Economy MHI 2/4/8/16

Materials

Pump base EN-GJL-250 with cataphoretic coating, hydraulics in 1.4301/1.4404 (AISI 304/316L)	—
Parts in contact with fluid in 1.4301 (AISI 304)	•
Parts in contact with fluid in 1.4404 (AISI 316L)	• (only versions 2../4../8..)

Seal version

Seal	EPDM/Viton
------	------------

Hydraulic connection

Threaded connection	•
Oval flange	—
Round flange	—
Victaulic quick coupling	—

Motor version

Individual motors	optional
1~230 V, 50 Hz	• (up to $P_2 = 1.5 \text{ kW}$)
3~230 V, 50 Hz	—
3~400 V, 50 Hz	• (up to $P_2=4 \text{ kW}$ for 230/400V; from $P_2=5.5 \text{ kW}$ and higher only for 400 V Δ)
3~500 V, 50 Hz	—
1~110 V, 60 Hz	optional
1~220 V, 60 Hz	optional
3~380 V, 60 Hz	optional
3~400 V, 60 Hz	optional
3~440 V, 60 Hz	optional
3~460 V, 60 Hz	optional
3~480 V, 60 Hz	optional
3~380 V to 440 V and 50 Hz to 60 Hz	—
Protection class	IP 54
Explosion protection	—
Motors with PTC thermistors	optional
Motors with UL certificates	—
Motors with CSA certificates	—
Thermal motor protection switch	• (only 1~motors)
Speed can be controlled via external FC	•
Integrated frequency converter	• (for 1~ motors)

Pump base (in contact with the fluid)		–		

• = available, – = not available

Note on inlet pressure

The maximum inlet pressure is calculated by subtracting the maximum delivery head of the pump at Q= 0 from the maximum operating pressure of the system.

Note on materials

1.4301 corresponds to AISI 304, 1.4404 corresponds to AISI 316L.

High-pressure multistage centrifugal pumps

Single pumps

Series description Wilo-Economy MHIE

Design

Non-self-priming multistage pump with integrated frequency converter

- Integrated frequency converter
- Three-phase version with red-button technology and LCD display for status display
- Integrated thermal motor protection

Application

- Water supply and pressure boosting
- Fire fighting systems
- Industrial circulation systems
- Process engineering
- Cooling water circulation systems
- Washing and sprinkling systems

Type key

Example: **MHIE 402-1/E/3-2/M13-2G**

MHIE	Multistage horizontal high-pressure centrifugal pump, electronically controlled
4	Volume flow in m ³ /h
02	Number of impellers
1	Material 1 = 1.4301 (AISI 304) 2 = 1.4404 (AISI 316L)
E	Seal type E = EPDM V = Viton
3	1 = 1~ (single-phase current) 3 = 3~ (three-phase current) - = hydraulics without motor
M13	Preset operating mode on delivery M13 = mode 1 or 3 (manual or remote control) M2 = mode 2 (pressure controlled operation)
2G	Frequency converter, second generation

Technical data

- Mains connection 1 ~ 230 V / 50 Hz or 230 V / 60 Hz
- Mains connection 3~400 V / 50 Hz (Y) or 400 V / 60 Hz (Y)
- Fluid temperature -15 to +110 °C
- Max. operating pressure 10 bar
- Max. inlet pressure 6 bar
- Protection class IP 54
- Emitted interference in accordance with EN 50081 T2 (EN 50081 T1 optional)
- Interference resistance in accordance with EN 50082 T2
- Nominal diameters of pipe connections on suction side Rp 1, Rp 1 1/4, Rp 1 1/2 or Rp 2, depending on type
- Nominal diameters of pipe connections on pressure side Rp 1, Rp 1 1/4 or Rp 1 1/2, depending on type

Materials

- Impellers, stage chambers and pump housing stainless steel 1.4301/1.4404
- Shaft stainless steel 1.4404
- Seal EPDM (EP 851) / Viton
- Mechanical seal B-carbon/tungsten carbide
- Bearing tungsten carbide
- Pump base aluminium

Scope of delivery

- Pump
- Installation and operating instructions

Special features/product benefits

- Easy commissioning
- All parts that come in contact with the fluid are made of stainless steel 1.4301 (AISI 304) or 1.4404 (AISI 316 L)
- Compact design
- Integrated frequency converter
- Full motor protection
- All relevant components are KTW- and WRAS-certified

Equipment/function

- Stainless steel pump with block construction
- Hydraulics in 1.4301
- Threaded connection

High-pressure multistage centrifugal pumps

Single pumps

Series description Wilo-Helix V

Design

Non-self-priming, high-efficiency multistage high-pressure centrifugal pump in vertical design with inline connections

Application

- Water supply and pressure boosting
- Industrial circulation systems
- Process water
- Cooling water circuits
- Fire extinguishing systems
- Washing systems
- Irrigation

Type key

Example: **Helix V2202/2-3/16/E./.400-50**

Helix V	Vertical, multistage high-pressure centrifugal pump in inline design
22	Volume flow in m ³ /h

2	Number of trimmed impellers (optional)
3	Pump material
2 =	pump base 1.4408 (AISI 316) hydraulics 1.4404 (AISI 316L)
3 =	pump base EN-GJL-250 (cataphoretic coating) hydraulics 1.4307 (AISI 304L)
E	Seal type E = EPDM V = FKM
16	Maximum operating pressure in bar optional
..	
400	Connection voltage in V
50	Frequency in Hz

Special features/product benefits

- Efficiency-optimised, laser-welded 2D/3D high-efficiency hydraulics
- IEC standard motor, 3-phase, 2-pole
- Easy pump replacement without pipe modification. Due to the modular pump housing, HELIX pumps can be installed in existing pipes.
- Easy-to-use mechanical seal with cartridge, equipped with a standard seal for easy maintenance.
- The spacer coupling enables the fast and easy replacement of the motor (from 5.5 kW and higher)
- The new flexible lantern design, which is available in two alignments, enables direct access to the mechanical seal.

- Potable water approval according to ACS/KTW/WRAS for all parts that come in contact with the fluid

Equipment/function

- Corrosion-resistant impellers, guide wheels and stage housing

Technical data

- Electrical connection: 3~ 400 V 50 Hz
- Fluid temperature: -20 to 120 °C
- Maximum operating pressure: 16/25 bar
- Protection class IP 55
- Ambient temperature: max. +40°C (extended temperature ranges on request)
- Available designs: PN 16 and PN 25 with loose round flanges in accordance with ISO 2531 and ISO 7005

Materials

- Impellers, guide wheels, stage housing made of stainless steel 1.4307
- Pump housing made of cataphoretically coated cast iron EN-GJL 250
- Shaft made of stainless steel 1.4057
- Shaft protection sleeve 1.4404
- O-ring made of EPDM EP856 (FKM seal on request)
- Shaft protection sleeve made of 1.4301

Scope of delivery

- Multistage high-pressure centrifugal pump
- Screws, nuts and seals for fixation of the counter flange
- Installation and operating instructions

High-pressure multistage centrifugal pumps

Single pumps

Overview of versions Wilo-Helix V

Wilo-Helix V	
Materials	
Pump base EN-GJL-250 with cataphoretic coating, hydraulics in 1.4307/1.4404 (AISI 304L/316L)	•
Impellers, guide wheels and stage housing made of stainless steel 1.4307 (AISI 304L)	•
Seal version	
Seal	EPDM/FKM (Viton optional)
Hydraulic connection	
Threaded connection	-
Oval flange	-
Loose flange (round)	•
Victaulic quick coupling	-
Motor version	
Individual motors	optional
3~230 V, 50 Hz	• up to $P_2 = 4 \text{ kW}$
3~400 V, 50 Hz	•
3~500 V, 50 Hz	-
3~380 V, 60 Hz	optional
3~400 V, 60 Hz	optional
3~440 V, 60 Hz	optional
3~460 V, 60 Hz	optional
3~480 V, 60 Hz	optional
3~380 V to 440 V and 50 Hz to 60 Hz	optional
Protection class	IP 55
Explosion protection	optional
Motors with PTC thermistors	optional
Speed can be controlled via external FC	-
Integrated frequency converter	-
Painting	
Individual painting	•
Mechanical seal	
Tungsten carbide/carbon	• (25 bar)
SIC/carbon	• (16 bar)
Tungsten carbide/tungsten carbide	optional
SIC/SIC	optional

High-pressure multistage centrifugal pumps

Single pumps

Technical data Wilo-Helix V

Wilo-Helix V ...

Approved fluids

Potable water, heating water, process water	•
Condensate	-
Water/glycol mixtures (max. 40 %; with admixtures exceeding 10 %, the pumping data must be checked)	•
Other low viscous fluids (without abrasive or long-fibre constituents, provided they do not corrode the materials used)	•

Power

Max. volume flow [m³/h]	35.0
Max. delivery head [m]	66
Fluid temperature	20 °C ... 120 °C
Max. ambient temperature	40
Operating pressure	16/25
Inlet pressure	10
Nominal speed	2900

Motor

Mains connection 1~ (permitted voltage tolerance +/- 10%)	-
Mains connection 3~ (permitted voltage tolerance +/- 10%)	•
Insulation class	F
Radio shielding degree	-
Protection class	IP 55

Connections

Nominal diameter of pipe connections on suction side	-
Nominal diameter of pipe connections on pressure side	-
Flange connections PN 16/PN 25	-
Vicatualic connections	-

Materials

Impeller (standard)	1.4307
Stage chambers	1.4307
Pump housing	EN-GJL-250
Pump shaft	1.4057
Seal	EPDM/FKM (Viton optional)
Mechanical seal	EPDM
Pressure shroud	1.4301
Bearing	Tungsten carbide/ceramic
Pump base	EN-GJL-250 (cataphoretically coated)

• = available, - = not available

Note on inlet pressure

The maximum inlet pressure is calculated by subtracting the maximum delivery head of the pump at Q= 0 from the maximum operating pressure of the system.

Note on materials

1.4307 corresponds to AISI 304L, 1.4404 corresponds to AISI 316L.

High-pressure multistage centrifugal pumps

Single pumps

Series description Wilo-Helix VE

Design

Non-self-priming, high-efficiency vertical version high-pressure multistage centrifugal pump with in-line connections and integrated, air-cooled frequency converter

- Easy-to-use mechanical seal with cartridge, equipped with a standard seal for easy maintenance.
- Potable water approval according to ACS/KTW/WRAS for all parts that come in contact with the fluid

Application

- Water supply and pressure boosting
- Industrial circulation systems
- Process water
- Cooling water circuits
- Washing systems
- Irrigation

Equipment/function

- Integrated frequency converter, motor temperature monitoring and overload protection
- Corrosion-resistant impellers, guide wheels and stage housing

Type key

Example: **Helix VE2203-1/16/E/3-2-2G**

Helix VE Vertical, multistage high-pressure centrifugal pump in inline design (electronically controlled)

22 Volume flow in m³/h

03 Number of impellers

1 Pump material

1 = pump base 1.4301 (AISI 304)
hydraulics 1.4301 (AISI 304)

2 = pump base 1.4408 (AISI 316)
hydraulics 1.4404 (AISI 316L)

3 = pump base EN-GJL-250 (cataphoretic coating)
hydraulics 1.4307 (AISI 304L)

16 Maximum operating pressure in bar

E Seal type
E = EPDM
V = FKM

3 3~

2 2-pole

2G Frequency converter, second generation

Technical data

- Electrical connection: 3~ 380–400V 50 & 60 Hz
- Fluid temperature: -20 to 120 °C
- Maximum operating pressure: 16/25 bar
- Protection class IP55 ($\geq 11\text{kW}$: IP 54)
- Ambient temperature: max. +50°C ($\geq 11\text{kW}$: max. +50°C)
- Available designs: PN16 and PN25 with round loose flanges in accordance with ISO 2531 and ISO 7005

Scope of delivery

- Multistage high-pressure centrifugal pump with frequency converter
- Screws, nuts and seals for fixation of the counter flange
- Installation and operating instructions

Special features/product benefits

- Efficiency-optimised, laser-welded 2D/3D high-efficiency hydraulics
- Integrated frequency converter with wide control range
- The spacer coupling enables the fast and easy replacement of the motor (from 5.5 kW and higher)
- The new flexible lantern design, which is available in two alignments, enables direct access to the mechanical seal.
- Easy pump replacement without pipe modification. Due to the modular pump housing, HELIX pumps can be installed in existing pipes.

High-pressure multistage centrifugal pumps

Single pumps

Series description Wilo-Multivert MVI

Design

Non-self-priming multistage pump

Application

- Water supply and pressure boosting
- Fire extinguishing systems
- Boiler feed
- Industrial circulation systems
- Process engineering
- Cooling water circulation systems
- Washing and sprinkling systems

Type key

MVI 1..
to MVI 52..

Example: **MVI 1602CN/6-1/16/E/3-400-50-2**

MVI	Multistage vertical high-pressure centrifugal pump
16	Volume flow in m ³ /h
02	Number of impellers
C	Option: C = mechanical seal with cartridge
N	Standardised motor
6	Only with MVI 16..: 6 = 6" hydraulics - = 8" hydraulics
1	Material 1 = 1.4301 (AISI 304) 2 = 1.4404 (AISI 316L) 3 = pump base EN-GJL-250 (cataphoretic coating), hydraulics 1.4301 (AISI 304)
16	Flange type 16 = flange PN16 (round or oval) 25 = flange PN25 (round or oval) P = Victaulic coupling
E	Seal type E = EPDM V = Viton
3	1 = 1~ (single-phase current) 3 = 3~ (three-phase current)
400	Connection voltage in V
50	Frequency in Hz
2	Number of poles

MVI 70.. to MVI 95..

Example:

MVI 7002/1N/16/E/3-400-50-2

MVI	Multistage vertical high-pressure centrifugal pump
70	Volume flow in m ³ /h
1	Number of trimmed impellers
N	Standardised motor
16	Flange type 16 = flange PN16 (round or oval) 25 = flange PN25 (round or oval) P = Victaulic coupling
E	Seal type E = EPDM V = Viton
3	1 = 1~ (single-phase current) 3 = 3~ (three-phase current)
400	Connection voltage in V
50	Frequency in Hz
2	Number of poles

Special features/product benefits

- All parts that come in contact with the fluid are made of stainless steel 1.4301 (AISI 304) or 1.4404 (AISI 316 L)
- All relevant components are KTW- and WRAS-certified
- Drive via IEC standard motors

Equipment/function

- Stainless steel pump in inline design
- Version: PN16 with oval flange; PN25 with round flange (optionally with Victaulic connection)
- IEC standard motor

Technical data

- Mains connection 1~230 V / 50 Hz or optionally 220 V / 60 Hz (up to 1.5 kW)
- Mains connection 3~230 V / 50 Hz (Δ) or optionally 220V / 60 Hz (Δ) up to 4.0 kW, 400 V / 50 Hz (Y) or optionally 380 V / 60 Hz (Y) from 4.0 kW and higher
- Fluid temperature -15 to +120 °C
- Max. operating pressure 16/25 bar
- Max. inlet pressure 10 bar
- Protection class IP 55
- Flange connection G1/DN 25
- Optionally with Victaulic connections

High-pressure multistage centrifugal pumps

WILO

Single pumps

Series description Wilo-Multivert MVI

Materials

- Impellers and stage chambers stainless steel 1.4301/1.4404 (MVI 16-6 only in 1.4301)
- Pump housing stainless steel 1.4301 / 1.4404
- Shaft, depending on type, stainless steel 1.4301 / 1.4404
- Seal EPDM (EP 851) /Viton
- Housing cover stainless steel 1.4301 / 1.4404
- Lower housing section stainless steel 1.4301 / 1.4404
- Mechanical seal B-carbon/tungsten carbide, SiC/carbon
- Pressure shroud stainless steel 1.4301 / 1.4404
- Bearing tungsten carbide
- Pump base EN-GJL-250

Scope of delivery

- Pump
- Oval counter flanges Rp 1 to Rp 1 1/2 (only with PN 16 version)
- Installation and operating instructions

Note on inlet pressure

The maximum inlet pressure is calculated by subtracting the maximum delivery head of the pump at Q= 0 from the maximum operating pressure of the system.

Note on materials

1.4301 corresponds to AISI 304, 1.4404 corresponds to AISI 316L.

High-pressure multistage centrifugal pumps

WILO

Single pumps

Series description Wilo-Multivert MVIE

Design

Non-self-priming multistage pump with integrated frequency converter

Application

- Water supply and pressure boosting
- Fire extinguishing systems
- Industrial circulation systems
- Process engineering
- Cooling water circulation systems
- Washing and sprinkling systems

Type key

MVIE 1.. up to MVIE 52..

Example: **MVIE 1602/6-1/16/E/3-400-50-2**

MVIE	Multistage vertical high-pressure centrifugal pump, electronically controlled
16	Volume flow in m ³ /h
02	Number of impellers
6	Only with MVI 16..: 6 = 6" hydraulics - = 8" hydraulics
1	Material 1 = 1.4301 (AISI 304) 2 = 1.4404 (AISI 316L) 3 = pump base EN-GJL-250 (cataphoretic coating), hydraulics 1.4301 (AISI 304)
16	Flange type 16 = flange PN16 (round or oval) 25 = flange PN25 (round or oval) P = Victaulic coupling
E	Seal type E = EPDM V = Viton
3	1 = 1~ (single-phase current) 3 = 3~ (three-phase current)
400	Connection voltage in V
50	Frequency in Hz
2	Number of poles

MVIE 70.. to MVIE 95..

Example: **MVIE 7003/1-3/16/E/3-2**

MVIE	Multistage vertical high-pressure centrifugal pump
70	Volume flow in m ³ /h

03	Number of impellers
1	Number of trimmed impellers
3	Material 3 = pump base EN-GJL-250 (cataphoretic coating), hydraulics 1.4301 (AISI 304); seal EPDM
16	Flange type 16 = flange PN16 (round) 25 = flange PN25 (round)
E	Seal type E = EPDM
3	1 = 1~ (single-phase current) 3 = 3~ (three-phase current)
2	Number of poles

Special features/product benefits

- Easy commissioning
- Integrated frequency converter
- Full motor protection
- Wide control range
- All parts that come in contact with the fluid are made of stainless steel 1.4301 (AISI 304) or 1.4404 (AISI 316 L)
- All relevant components are KTW- and WRAS-certified

Technical data

- Mains connection 3~400 V / 50 Hz (Y) or 400 V / 60 Hz (Y)
- Fluid temperature -15 to +120 °C
- Max. operating pressure 16 bar or 25 bar
- Max. inlet pressure 10 bar
- Protection class IP 54 or IP 55

Materials

- Impellers stainless steel 1.4301/1.4404
- Stage chambers stainless steel 1.4301/1.4404
- Pump housing EN-GJL-250 / 1.4404
- Shaft, depending on type, stainless steel 1.4057 / 1.4404
- Seal EPDM (EP 851) / Viton
- Housing cover stainless steel 1.4301 / 1.4404
- Lower housing section stainless steel 1.4301 / 1.4404
- Mechanical seal B-carbon/tungsten carbide, SiC/carbon
- Pressure shroud stainless steel 1.4301 / 1.4404
- Bearing tungsten carbide
- Pump base EN-GJL-250 / 1.4408, depending on type

Scope of delivery

- Pump
- Oval counter flanges Rp 1 to Rp 1 1/2 (only with PN 16 version)
- Installation and operating instructions

High-pressure multistage centrifugal pumps

Single pumps

• = available, - = not available

Note on inlet pressure

The maximum inlet pressure is calculated by subtracting the maximum delivery head of the pump at Q= 0 from the maximum operating pressure of the system.

Note on materials

1.4301 corresponds to AISI 304, 1.4404 corresponds to AISI 316L.

High-pressure multistage centrifugal pumps

Single pumps

Series description Wilo-Multivert MVIS

Design

Non-self-priming multistage pump with glandless pump motor

Application

- Water supply and pressure boosting systems

Type key

Example: **MVIS 402-1/16/E/3-400-50-2**

MVIS	Multistage vertical high-pressure centrifugal pump in glandless pump technology
4	Volume flow in m ³ /h
02	Number of impellers
1	Material 1 = 1.4301 (AISI 304)
16	Nominal pressure in bar
K	Seal type EPDM
3	1 = 1~ (single-phase current) 3 = 3~ (three-phase current)
400	Connection voltage in V
50	Frequency in Hz
2	Number of poles

Special features/product benefits

- Low-noise (up to 20 dB [A] quieter than conventional pumps)
- All parts that come in contact with the fluid are made of stainless steel 1.4301 (AISI 304)
- Glandless pump technology
- All relevant components are KTW- and WRAS-certified

Equipment/function

- Stainless steel pump in inline design
- Three-phase motor in glandless design

Technical data

- Mains connection 3~230 V / 50 Hz (D), 220 V / 60 Hz (D), 400V / 50 Hz (Y) or 380 V / 60 Hz (Y)
- Fluid temperature -15 to +50 °C
- Max. operating pressure 16 bar
- Max. inlet pressure 10 bar
- Protection class IP 44
- Nominal diameters of pipe connections Rp 1, Rp 1½ or Rp 1½, depending on type

Materials

- Impellers stainless steel 1.4301
- Stage chambers stainless steel 1.4301
- Pump housing stainless steel 1.4301
- Shaft stainless steel 1.4122
- Seal EPDM (EP 851)
- Lower housing section stainless steel 1.4301
- Pressure shroud stainless steel 1.4301
- Bearing carbon, synthetic resin impregnated
- Pump base EN-GJL-250

Scope of delivery

- Pump
- Oval counter flanges Rp 1 to Rp 1 1/2
- Installation and operating instructions

High-pressure multistage centrifugal pumps

Single pumps

Overview of versions Wilo-Multivert MVIS

• = available, – = not available

Note on inlet pressure

The maximum inlet pressure is calculated by subtracting the maximum delivery head of the pump at Q= 0 from the maximum operating pressure of the system.

Note on materials

1.4301 corresponds to AISI 304, 1.4404 corresponds to AISI 316L.

High-pressure multistage centrifugal pumps

WILO

Single pumps

Series description Wilo-Multivert MVISE

Design

Non-self-priming multistage pump with glandless pump motor and integrated frequency converter

Application

• Water supply and pressure boosting

Type key

Example: **MVISE 402-1/16/E/3-2/2G**

MVISE	Multistage vertical high-pressure centrifugal pump in glandless pump technology
4	Volume flow in m ³ /h
02	Number of impellers
1	Material 1 = 1.4301 (AISI 304)
16	Nominal pressure in bar
E	Seal type E = EPDM
3	1 = 1~ (single-phase current) 3 = 3~ (three-phase current)
2	Number of poles
2G	Frequency converter, second generation

Special features/product benefits

- Easy commissioning
- Glandless pump technology
- Low-noise (up to 20 dB [A] quieter than conventional pumps)
- Integrated frequency converter
- All parts that come in contact with the fluid are made of stainless steel 1.4301 (AISI 304)
- All relevant components are KTW- and WRAS-certified

Technical data

- Mains connection 3~400 V/50 Hz
- Fluid temperature -15 to +50 °C
- Max. operating pressure 16 bar
- Max. inlet pressure 10 bar
- Protection class IP 44
- Nominal diameters of pipe connections Rp 1, Rp 1½ or Rp 1¾

Materials

- Impellers and stage chambers
- stainless steel 1.4301/1.4404 (MVI 16-6 only in 1.4301)
- Pump housing stainless steel 1.4301 / 1.4404

- Shaft, depending on type, stainless steel 1.4301 / 1.4404
- Seal EPDM (EP 851) / Viton
- Housing cover stainless steel 1.4301 / 1.4404
- Lower housing section stainless steel 1.4301 / 1.4404
- Mechanical seal B-carbon/tungsten carbide, SiC/carbon
- Pressure shroud stainless steel 1.4301 / 1.4404
- Bearing tungsten carbide
- Pump base EN-GJL-250

Scope of delivery

- Pump
- Oval counter flanges Rp 1 to Rp 1 1/2 (only with PN 16 version)
- Installation and operating instructions

High-pressure multistage centrifugal pumps

Single pumps

Overview of versions Wilo-Multivert MVISE

Wilo-Multivert MVISE-2G

Materials

Pump base EN-GJL-250 with cataphoretic coating, hydraulics in 1.4301/1.4404 (AISI 304/316L)	•
Parts in contact with fluid in 1.4301 (AISI 304)	•
Parts in contact with fluid in 1.4404 (AISI 316L)	–

Seal version

Seal	EPDM
------	------

Hydraulic connection

Threaded connection	–
Oval flange	•
Round flange	–
Victaulic quick coupling	•

Motor version

Individual motors	–
1~230 V, 50 Hz	–
3~230 V, 50 Hz	–
3~400 V, 50 Hz	•
3~500 V, 50 Hz	–
1~110 V, 60 Hz	–
1~220 V, 60 Hz	–
3~380 V, 60 Hz	–
3~400 V, 60 Hz	–
3~440 V, 60 Hz	–
3~460 V, 60 Hz	–
3~480 V, 60 Hz	–
3~380 V to 440 V and 50 Hz to 60 Hz	–
Protection class	IP 44
Explosion protection	–
Motors with PTC thermistors	–
Motors with UL certificates	optional
Motors with CSA certificates	optional
Thermal motor protection switch	–
Speed can be controlled via external FC	–
Integrated frequency converter	–
Painting	
Individual painting	•

Technical data Wilo-Multivert MVISE

	Wilo-Multivert MVISE .. - 2G		
	2..	4..	8..
Approved fluids			
Potable water, heating water, process water	•	•	•
Condensate	-	-	-
Water/glycol mixtures (max. 40 %; with admixtures exceeding 10 %, the pumping data must be checked)	•	•	•
Other low viscous fluids (without abrasive or long-fibre constituents, provided they do not corrode the materials used)	-	-	-
Power			
Max. volume flow [m ³ /h]	3.0	5.0	8.0
Max. delivery head [m]	66	67	68
Fluid temperature	-10 °C ... 50 °C	-10 °C ... 50 °C	-10 °C ... 50 °C
Max. ambient temperature	40	40	40
Operating pressure	10	10	10
Inlet pressure	6	6	6
Nominal speed	2900	2900	2900
Motor			
Mains connection 1~ (permitted voltage tolerance +/- 10%)			
Mains connection 3~ (permitted voltage tolerance +/- 10%)		400 V, 50 Hz Y or 400 V, 60 Hz Y	
Insulation class	F	F	F
Emitted interference		EN 50081-1	
Interference resistance	EN 50082-2	EN 50082-2	EN 50082-2
Protection class	IP 44	IP 44	IP 44
Connections			
Nominal diameter of pipe connections on suction side	1	1	1½
Nominal diameter of pipe connections on pressure side	1	1	1
Flange connections PN 16/PN 25	-	-	-
Vicatualic connections	-	-	-
Materials			
Impeller (standard)		1.4301	
Stage chambers		1.4301	
Pump housing		1.4301	
Pump shaft		1.4122	
Seal		EPDM	
Housing cover			

High-pressure multistage centrifugal pumps

Single pumps

Technical data Wilo-Multivert MVISE

	Wilo-Multivert MVISE .. – 2G		
	2..	4..	8..
Lower housing section		1.4301	
Mechanical seal			
Pressure shroud		1.4301	
Bearing		Carbon, synthetic resin impregnated	
Pump base		EN-GJL-250	
Pump base (in contact with the fluid)		–	

* = available, – = not available

Note on inlet pressure

The maximum inlet pressure is calculated by subtracting the maximum delivery head of the pump at Q= 0 from the maximum operating pressure of the system.

Note on materials

1.4301 corresponds to AISI 304, 1.4404 corresponds to AISI 316L.

High-pressure multistage centrifugal pumps

WILO

Accessories

Mechanical accessories

Stainless steel counter flange (round)

Stainless steel counter flange for cases in which contact between the fluid and the standard-equipped GG – flanges is not desired.

> Materials

Counter flange: PN 16 1.4301 (oval)/1.4404 (round)

Screws: St galvanized

Seal: EPDM/Viton

A	B	C	D
G1	99	75	26±1
G1 ¼	99	75	27±1
G1 ½	130	100	29±1

> Scope of delivery

The set contains 2 counter flanges and screws. **Please order seals separately!**

Depending on the pumping application: EPDM version or VITON version.

> Technical data

Permitted fluid: see stability list

Operating pressure: 16 / 25 bar (see also pump application limits)

Fluid temperature: 50° / 120° C

Steel counter flange (round)

not illustrated

The kit consists of 2 x counter flanges as round flanges in steel version for HELIX V, MVI pump series.

Victaulic coupling

Quick-release couplings for pumps with Victaulic connection ports.

> Materials

Coupling halves: GG galvanized

Screws: St galvanized

Seal: EPDM/Viton

Union inserts: 1.4435

Pump type	Ø D	DN	Ø F	L	H	M
MVI / MVIS 200/400	42.2	34.4	R1 ¼	219	50	320 – 323
MVI / MVIS 800/1600	60.3	52.3	R2	261	80	378

> Scope of delivery

The set contains 2 couplings, including with screws, seals and installation instructions.

> Technical data

Permitted fluid: see stability list

Operating pressure: 16 / 25 bar (see also pump application limits)

Fluid temperature: 50 °C / 120 °C

High-pressure multistage centrifugal pumps

Accessories

Mechanical accessories

Bypass line

The use of bypass lines is always practical in cases where the fluid contains large amounts of air or oxygen or emits gases in any other way. The bypass line prevents any concentration of gas or air to a large extent in the upper area of the pump hydraulics of MVI pumps and thus in the vicinity of the mechanical seal.

> **Typical user benefits:**

Pumping condensate / pressure boosting where the pump(s) pump out of atmospherically ventilated tanks.

> **Materials**

Screwed connection: MS nickel-plated

Seal: EPDM/Viton

All other components: 1.4404

> **Scope of delivery**

The set includes all components required for constructing the complete bypass line.

> **Technical data**

Operating pressure: max. 25 bar (see also pump application limits)

Fluid temperature: max. 120 °C

Nominal connection diameter: MVI 2/4/8/16/32; $\frac{1}{8}$ "

Pressure sensor

not illustrated

For the installation of an automatic pressure-dependent system with speed-controlled pumps of the MVISE, MVIE and MHIE series. The sensor is installed on the discharge side.

Important:

Please observe the installation notes in the installation and operating instructions for the pumps.

> **Technical data**

Pressure range: 0 – 10 bar

Signal range: 4 – 20 mA

> **Option**

Sensors for pressure ranges
0 – 16, 0 – 25, 0 – 40 bar

PTC thermistor tripping unit

not illustrated

Tripping unit for switch cabinet installation for all MVI series pumps that are equipped with PTC thermistor sensors.
